

Team Productivity in RStudio Server Pro

What we're covering

New, analyst-focused productivity features in RStudio Server Pro:

1. Multiple session support w/ dashboard
2. Sharing projects, collaborating, and pair programming
3. Multiple R versions

Multiple session support

- Like having multiple RStudios
- Let long-running jobs run while you do other work
- Create your own master control panel with with workspaces ready to perform common tasks

Multiple session support

Demo

Sharing Projects

- Quickly invite people you trust to work with you in an RStudio project
- Permissions managed automatically at the filesystem level, without touching original file permissions
- Users get their own workspace & history
- See whether other users are online and what they're doing
- Real-time typing from other users, like Google Docs – no more conflicting edits
- Pair programming & code review with cursor following

Sharing Projects

Demo

Multiple R versions

- Reproducibility
- Compatibility
- Default + per-project setting
